Frontera Resources awarded Directional Drilling and MWD services contract at its Dino-2 well in Georgia to EDI

Dubai, UAE
March 18, 2018

Energy Drilling International (EDI) has been awarded the Directional Drilling & MWD services contract from Frontera Resources Corporation, the European-focused oil and gas exploration and Production Company.

Frontera has announced that drilling of a sidetrack on the Dino-2 well, the second well of the current three well drilling campaign in the Taribani complex of Block 12 in Georgia, commenced on March 20, 2018.

The drilling operations are expected to be completed within the month of April reaching a total target depth of 2,700 metres.

Following completion of the drilling operations, testing of the well is expected to commence and, as previously announced, it is the intention that Zones 9, 14 and 15 of the Eldari reservoir will be stimulated and produced together.

Andrew Moncur, CEO and founder of EDI, said, "We are excited to help Frontera expand its drilling program and we are committed to provide the best directional drilling services in Georgia. This contract also kick starts EDI's strategic expansion into the pan-Caspian and CIS markets where we we'll be providing best-in-class services to our growing client base."

Once the testing is completed, the company Frontera Resources will update the market in due course.
